ac.dokkar@ensta.edu.dz

Education

National Higher School of Advanced Technologies (ENSTA)
Preparatory Cycle (Mathematics & Informatics) | October 2023 – June 2025
First-Year Engineering Cycle (AI & Applications) | October 2025 – Present

Technical Skills

Frontend: React (Advanced), Tailwind CSS, HTML5, CSS3

Backend & Databases: Firebase (Realtime Database & Authentication), T3 Stack, SQL

Programming Languages: JavaScript, Python, Java, C

Tools & Platforms: Git, GitHub, Vercel, Jira

Personal Projects

Shop Hub | E-commerce Search Aggregator
• Engineered a centralized search engine for the Algerian market, synchronizing listings across platforms and integrating AI to enhance search functionality.
• Implemented real-time data aggregation using the T3 Stack and managed Cloud deployment via Vercel to ensure high availability.

UniHub | Student Utility Platform (Lost & Found Module)
• Developed a real-time reporting module, architecting the entire backend with Firebase for data storage and authentication.
• Engineered the logic for instantaneous status updates, significantly streamlining the item recovery process for students.

Official Website | Einsteins Club
• Designed and implemented the site header and the secure member section as part of the platform's architecture.
• Utilized a professional Git/GitHub workflow for version control and collaborative development to ensure high-quality code standards.
